

04_Long_Term_vs_Short_Term_Income.rtf

Long-Term vs Short-Term Crypto Income

Both approaches can work — but they are **not** the same game.

Long-Term Income

- • Lower stress
- • Fewer decisions
- • Compound growth over time

Requires patience and conviction.

Short-Term Income

- • Faster feedback
- • Higher emotional pressure
- • Requires strict rules

Most beginners underestimate the psychological challenge.

The Smart Approach

Many successful participants:

- • Build long-term positions first
- • Add short-term strategies later

Foundation before acceleration.

Crypto income is a **marathon with moments of speed**, not a sprint.
